## Personal Summary

I'm a full stack developer from Toronto. My areas of interest include automating workflows to boost productivity, learning complex data structures and animation. I'm a quick learner and it's driven me to learn as much as I can about web development.

## Professional Experience

### Full Stack Developer

Mar 2020 ~ Current 

- Built a range of websites / apps for clients' businesses, primary frontend stack: React, Sass
- Developing Email forwarding services with form processing & validations using AWS Serverless Lambdas, file uploads with Node.JS

### Digital Media Assistant
Discotoast Studios

Sep 2018 ~ May 2019 

Toronto, ON 

- Increased data & information processing efficiency by implementing formulae and macros, automating repetitive manual processes on Microsoft Excel with VBA scripts
- UX/UI tested websites functionality across various platforms and user types and protocols for clients
- Produced wireframes and sitemaps for web design layout, managed content on WordPress websites

### Digital Marketing & Sales Representative
Alfatec Machine Inc

Sep 2018 ~ May 2019 

Dorval, QC 

- Building Web Scraper Tool to collect leads with Python (bs4)
- Built Database for client information, with PostgreSQL

## Technologies

JavaScript

HTML5 + CSS3

Git

React

Node

Sass

Postgres

Ruby

Python

Webpack

GraphQL

## Sample Projects

### Todo App                                Code

A single-page todo app built with React. The app lets you create todos and sort them into groups.

### Grocery Inventory                       Code

A grocery inventory app written with Node.js. This application can be used to help manage inventory for a grocery store

### Where's Waldo                           Code

A simple game of Where's Waldo. I built this game as part of the Odin project to learn how to use Firebase.

More sample work available on my Github
